Chapter 1

Chapter 1 Title

Abstract

Use the chapterabstract environment, not the abstract environment, if you want to plant an abstract at the top of the chapter.

1.1 Introduction

> Here's a quote environment, if needed.

Here's a citation so we don't get a "no citation warning" Golub & van Loan (2013). Here's a figure. Here how to reference a figure such as Figure 1.1.
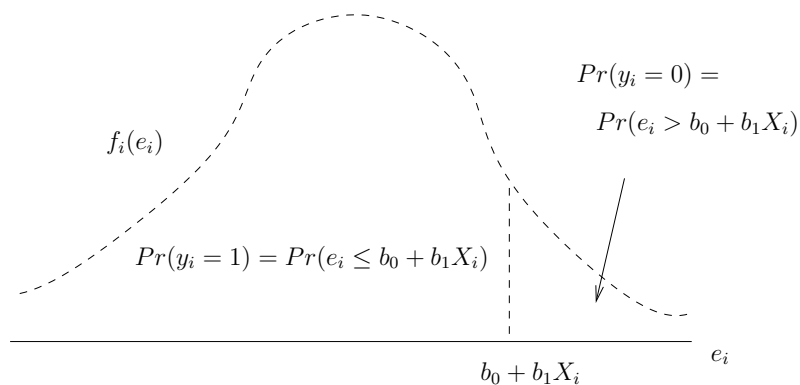

$f_i(e_i)$

$Pr(y_i = 0) =$
$Pr(e_i > b_0 + b_1 X_i)$

$Pr(y_i = 1) = Pr(e_i \leq b_0 + b_1 X_i)$

$b_0 + b_1 X_i$

e_i

Figure 1.1: Figure for listoffigures in the content page.

	R: polr	R: lrm	SAS	Stata
$\hat{b}_1$	-0.28	-0.28	0.28	-0.28
$\hat{\zeta}_1$	-4.24	4.24	-4.24	-4.24
$\hat{\zeta}_2$	-2.32	2.32	-2.32	-2.32

Table 1.1: Table for the listoftables in the contents page.

Here's a table.

Chapter 2

Chapter 2 Title

Abstract

Chapter 2 Abstract: Code and figure example.

2.1 Example Section
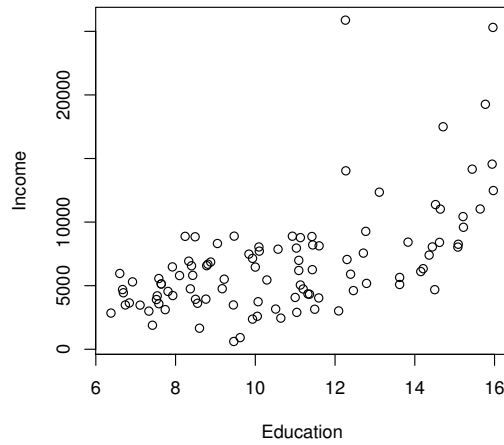

2.1.1 Code Example

Check on conventions on inputting code just to be safe. This is likely field dependent, so this is worth considering. This is the default style, which is aberrant to look at. In any case, this is how subimport works for nested files to organize your document with each chapter self contained in it's own folder.
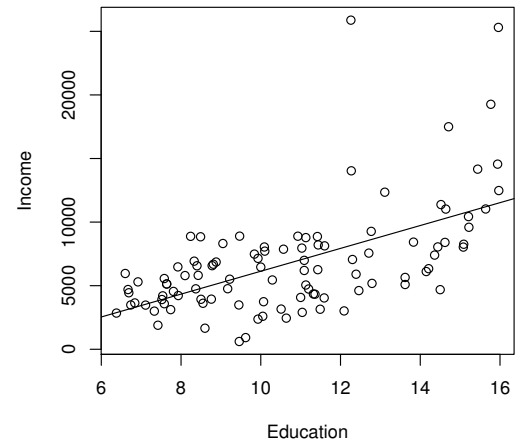

```
library(car)

pdf(file="car.inc.ed.pdf", height=5,width=5, onefile=F,
    paper="special")
plot(income~education, xlab="Education", ylab="Income",
    main="", data=Prestige)
dev.off()
```

2.1.2 Subfigure Example.

This is a true subfigure example.
